## Premise and Perimeter Security

**The Problem:** Terrorism, a frightening enemy, the unknown, an unseen enemy. Predators live among us, and hide suddenly striking where and when we least expect it. We ask: "What are the warning signs, who's at risk, and where are they likely to target?" An attacker's greatest weapon is the element of surprise; a terrorist's goal is to create havoc and paralyzing fear by making us think they can get us any time at any place. Business owners are scrambling to secure their working environments. Card access systems, security cameras, and security guards give a false sense of security unless proper risk management systems are in place.

**The Solution:** Systems and strategies to prevent attacks at your place of business. Know what your options are and incorporate the fundamentals of premises security into your daily functions. We provide you with the fundamentals of safety and the strategies for security to help you make smarter time; money; and life-saving decisions.

### You Learn How To:

- Assess risk and determine risk management.
- Put systems in place to keep the bad guys out.
- Secure surrounding areas against sabotage.
- Keep all departments safe from intruders.
- Identify the best means of security technology.
- Train employees to become security partners.
- Point out red flags and effective remedies.
- Defend yourself and staff non-violently.
- Work safely and securely with less stress.
